

Analyzer Planner

Azilon Compliance Manager

Compliance Audit Challenges

- Time Consuming Manual Audit Process
- Complex Paper Management
- Lack of Uniform Compliance Across Business Units
- Effort Intensive & Costly Tracking Process
- Lack of Resources to Manage Compliance Programs
- Complex Managerial Analysis of Audit Result

Azilon's web-based Analyzer Planner product is an interactive process management solution for assessment, gap analysis and ongoing compliance monitoring. It allows for decentralized audit Intelligence gathering and centralized audit value management. The solution is aimed towards creating a fully customized, re-usable compliance solution that helps build a unified audit effort, guiding an organization through their strategic goals and regulatory compliance requirements. The Analyzer-Planner solution can be customized to fit the structure of any regulated organization and can accommodate multiple concurrent audits that are question/ answer based with nested questions, multiple answer options and complex scoring model.

Core Proposition

Analyzer Planner's ability to provide management the means to view and understand compliance progress and audit issues from multiple perspectives, securely via the web, is one of its key unique strengths and an essential part of its core value proposition. It allows management to see the compliance progress both at the granular level and at the enterprise level.

How Analyzer Planner Works

Analyzer Planner checks the compliance levels based on regulatory definitions, provides comparisons of existing project progress with best practice plans, and can be administered to a variety of business units, external sites or entities. Information rolls up to an organizational view of compliance levels and automatically updating each time it is administered.

Analyzer Planner is secure, user-friendly, intuitive, and has a graphical user interface with robust reporting options. It allows the audit department to create audit element and a scoring model as per regulatory or business requirement and assigns them to specific audit users.

Analyzer Planner

Azilon Compliance Manager

Benefits

- Unifies Enforcement of Audit Process for Increase Control
- Increases Visibility on Critical Issues
- Enhances Resource Allocation
- Reduces Audit Redundancies
- Decreases Noncompliance
- Lessen Audit Backlog, Audit Efforts & Timelines
